

Precision Mechanical Hand Tachometers Deumo 1 & 3

A range of two Precision Mechanical Tachometers are available designed to cover virtually all speed ranges found in most types of Process Plant and general rotating machinery applications found in industry.

The Deumo range are ideal for contact speed measurement of rpm and linear speed in metres per minute.

Direct reading - the clear dial & fine pointer provide very good readability on the very long scale dial of the instrument.

Common features - all models

Range selector position switch
Accuracy +/- 0.5% fsd
Memory Mechanical pointer lock

Accessories supplied

2 x rpm cone
1 x female cone
1 x Metric disc
Carrycase & instructions

- Very wide speed range
- Clear reading - very long scale dial.
